Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Comments	10/709,557	LUBAWAY, RICHARD				
Office Action Summary	Examiner	Art Unit				
	Jerry Redman	3634				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 14 (previously presented) should have been rejected in the office action dated 11/10/2008 and therefore, this action is a non-final action.

The status of the claims is as follows:

Claims 1-20 are herein addressed below.

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The applicant recites a first and second cables but it is not readily understood by the Examiner. It appears that the applicant has listed a catalogue of parts but fails to properly set forth elements to form a working/novel invention.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burridge (3,219,335) in view of Pickles (3,736,702). Burridge ('335) discloses an apparatus for positioning a window (10) disposed in a closure of a vehicle (column 1, lines 11-24), a guide track (21) configured to be attached to the mounting surface, a carriage (20) having a plurality of rollers (28, 29, and 30) adapted to engage the guide track (21), a link (17) pivotally connected via a pin (see Figure 2, 18, spring allows

Art Unit: 3634

adjustment to and fro) to the carriage (20) at a first end to a first window bracket (14) and connected to the carriage (20) at a second end and an actuator (25) for moving the carriage along the guide track (21), and the plurality of rollers (28, 29, and 30) roll along the guide track to move the window (10) between a raised position and a lowered position. Burridge ('335) fails to disclose a pivotal strut. Pickles ('702) discloses a pivotal strut (50). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the apparatus of Burridge ('335) with a pivotal strut as taught by Pickles ('702) since a strut provides assistance to an opening/closing mechanism during the closing portion of the window path. To provide a plurality of struts is a mere duplication of parts and would have been obvious to one of ordinary skill in the art at the time of the invention to provide a plurality of struts to the window assembly of Burridge since more than one strut produces less stress and strain on any one single strut.

Depending on the applicant's amendments claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15-20 are allowable.

Claim 14 (previously presented) should have been rejected in the office action dated 11/10/2008 and therefore, this action is a non-final action. This is based on the fact that the bracket and carriage are pivotally connected as discussed in detail above.
